

# Case Study

## Calvert Green Park, Buckingham Aylesbury Vale District Council

**It was time to renew the old playground equipment at Calvert Green Park and Aylesbury Vale District Council chose HAGS to complete this project.**

### Renew and Refresh using the natural landscape

Buckinghamshire council's focus for this play area refurbishment was to rejuvenate the open space and create a sense of place while connecting users to natural environment by using landscaping elements such as natural boulders and mounding.

### Maximising the play value

The aim was to maximise play value using the ROSPA play value chart, activities such as spinning, climbing, balancing, rocking and swinging. The natural colour pallet and the use of timber also provided a sympathetic subtle view for close by residents. The linking pathway enhances accessibility and inclusion for all connecting them to equipment which is fun and challenging.
