Case Study

Faye Elizabeth Park Benson Parish Council

With a detailed brief to create a play area which would thrill children and grown-ups alike, Benson Parish Council chose HAGS over competitors due to extreme diligence and passion in creating an area which would provide a bespoke, robust and durable 'destination' play area.

With CIL funding in place, and consultations with the local community, Benson Parish Council was looking for an experienced company to design, project manage and build a truly unique, colourful and exciting 'destination' play area.

Working closely alongside the council to ensure the submission met the demands of the brief, the close-knit expert team of project managers and designers at HAGS developed a winning design which not only reflected the village's history but also provided children with a play space like no other. The design wowed the decision makers and now thrills the visitors to the park.

"The design proposal was the most comprehensive and imaginative of all submissions we had, with lovely touches that made the play area unique to our Parish. The price was competitive." said Anna Field, RFO at Benson Parish Council. "From the beginning HAGS approached the project with a sense of fun. As the brief was unusual, they tested our commitment to it with imaginative ideas and then built on those. Communication was outstanding all the way through the project and we felt fully supported. The active building stage was efficient and worry free. Any questions and requests we had were dealt with immediately and the project was completed on time."

When questioned whether Benson Parish Council would recommend HAGS, Anna answered: "Every time. We have another play park to refurbish and would love to use HAGS again."

The Park is in memory of Faye Elizabeth Grundy, and was opened by Faye's nieces Lexi-Faye and Kiki-Jay. More images and the opening day video can be found on our website at www.hags.co.uk/benson
